

PRESS RELEASE

X-RAY MANUFACTURER EXPERIENCES RECORD SALES AND LARGEST MULTIPLE SYSTEM ORDERS

MEKITEC LTD, A GLOBAL FOOD X-RAY MANUFACTURER AND SUPPLIER OF X-RAY INSPECTION SYSTEMS, TODAY ANNOUNCES RECORD SALES IN 2015 AND ITS LARGEST MULTIPLE UNIT ORDERS.

January 7, 2015 Irving, Texas. /PRNewswire-iReach/ -- The company's established MEKI™ line is a range of space and cost-efficient X-ray inspection solutions designed to help food processors meet and exceed the requirements of the Food Safety Modernization Act, (FSMA). The X-ray units detect metal, glass, stone, bone and other dense contaminants that may inadvertently find their way into food products. The inspection systems automatically inspect and reject non-conforming products from the production line, thereby protecting the manufacturer and consumers.

Terry Woolford, Mekitec Group COO states, "2015 was another record year for Mekitec, with global expansion in the Americas and Far East with significant double digit growth in EMEA, (Europe Middle East and Africa). Sales revenue was up very significantly versus prior year and we shipped a record number of systems globally. We have seen a large increase in orders for more than 10 units at one time over the last year. This is attributable to customers wholly replacing existing metal detection technology with more capable X-ray systems.

Woolford continues, "The cost of X-ray inspection systems has reduced in recent times, thereby removing a significant barrier for end users to implement. The growth in X-ray inspection technology is driven by increasing food safety legislation including the FSMA and meeting the requirements of HACCP, (Hazard Analysis Critical Control Points). Consumers are now much more aware and demand higher quality and safer food products. We are expecting this growth trend to continue and we are making investments into research and development and manufacturing capability to meet this demand".

About Mekitec

Mekitec has a combined experience of several decades in the development, industrialization and manufacturing of X-ray imaging systems, applied in medical, security and safety areas. This unique combination of in-depth knowledge of various industries has enabled the management to invest in long-term research and development especially for the food industry. The results of this focus and dedication are the state-of-the-art X-ray food safety systems that Mekitec supplies to its customers globally.

The product range is a high-performance, user-friendly and very space and cost competitive

X-ray technology system called MEKI. It is revolutionary as it provides 100% food quality control with high precision X-ray inspection that is designed to replace the simple metal detector with a similar investment. What's more, MEKI with its small and compact footprint, easily fits in every production line, thereby saving useful space in the factory.

With the MEKI range, food producers finally have the choice: To enjoy a fully automated, high precision and small yet cost-effective X-ray food inspection system. The groundbreaking MEKI systems provide food quality control without compromise!
